About the Property

The design approach to the Villas includes both character and style as it meets all the necessary requirements of a modern household while blending in with the surrounding image of the village. The residential complex is ideally integrated into the architecture of the village as a result of the use of stone cladding on the exterior of the villas which resembles the traditional approach of classical Cypriot country houses.

The design features Cyprus stone on partial facades next to the big windows and balconies.

The light fills the bedrooms through the big windows which creates a bright atmosphere in the interior and a positive mood. It also provides a large spacious terrace for each villa for family and friend gatherings or celebrations.

The project is situated in a green area stretching for miles around and these traditionally styled villas are designed to blend seamlessly with their surroundings.
